

PAGING SYSTEM FOR REMOTE CONTROL

- Fully compatible with INTRUDALERT & VIDALERT
- Cost Effective
- Immediate Alarm Transmission
- Automatic Operation
- Full Remote Functionality
- Easy Installation and Maintenance
- Suitable for Any Environment

RBtec's **RX-PAGE** is an advanced wireless paging system, providing reliable control for vital system functionality and notification.

The system is especially designed to provide a cost effective solution for remote control and guard management.

RX-PAGE is intended to transmit alarm signals accompanied by detailed information from the Control Center directly to remote staff, using dedicated server and own channels.

Alphanumeric Pager Features

- Holds up to 99 messages
- 4 line, 200 character display
- Vibrate and beep alert modes
- Operates on a single AAA battery
- Low battery indicator
- Automatic backlight
- Automatic On/Off increases battery life
- Pager cradle
- Set time and date from any LRS transmitter

Interface Transmitter Features

- Supports over 1000 pagers
- UHF frequency (420 – 470 MHz)
- 2-watt output power
- Synthesized frequency and modulation
- Complete software control
- 3 LED status indicators
- Operates on 110V or 220V
- All commands are sent via ASCII text
- Overall size: 4" x 8" x 1"
- Operating frequency: 420-470 MHz

Benefits

- Instant Communication - messages delivered immediately!
- Increased Productivity – instant messaging
- More descriptive messaging (Alphanumeric screen)
- Maintain a professional atmosphere with silent messaging

Description

- Up to 1.6 km range (2 watt transmitter power) – at the basic configuration
- Message memory - software remembers custom messages
- Supports up to 9,999 Alphanumeric or Numeric pagers
- Can send up to 255 characters to alphanumeric pagers only
- Supports group paging
